

Schoolhouse Montessori Academy®

Summer

Discovery School

10 weeks of high-energy exploration of some of the world's most fascinating mysteries, places, events, and people.

FUN FRIDAYS!

Back again for 2023— each Friday we'll have outdoor activities such as game days, bike days, sprinkler days and so much more!

Let's Go Camping June 19-23

Grab your gear everyone! Schoolhouse students will get ready to explore nature, learn about camping basics, safety, survival techniques, tent set up and compass use. They will study national parks such as the Grand Canyon, Yosemite, and Yellowstone. They'll tell stories, sing songs, learn how to make simple camp recipes and create goodies around the campfire.

When I Grow Up June 26-30

What do you want to be when you "grow up?" We ask our children this question all the time. This week students at Schoolhouse will learn about different professions (engineers, doctors, construction workers, etc.), their roles and responsibilities, participate in role play, and make career choices. Don't be surprised if a few unexpected visitors will stop by to show off their skills!

celebrating America July 3, July 5-7

There is no better time to foster a greater understanding of America's history than the week of July 4th – our country's Independence Day! This week, we'll learn about American independence and the important events leading to it. With stars and stripes everywhere, students will learn about states that played a key role in achieving independence, sing patriotic songs, try their hand at "revolutionary" 4th of July recipes, carry the torch with 4th of July crafts and much more!

going green July 10-14

What is going green? Going green is more than just recycling. It means to live as an individual, as a community in a way that is friendly to the environment and helps to sustain the Earth. This entire week we will learn about how we can reduce pollution, consumption and waste, and to conserve resources and energy, through fun hands-on activities. Children will create charts on global warming and do activities that will make Mother Nature proud!

Down on the Farm July 17-21

Children will experience life on the farm from the first cock-a-doodle-doo! Stories and art activities will involve all sorts of animals and their purposes. From cows and milk to hens and eggs, children will see how animals contribute to our food supply. They'll make real butter, cook mouth-watering, down-home recipes, learn about planting crops, and explore farm equipment. Your children will not want to miss any moments of this fun week!

under the Big Top July 24-28

Curtains open! Enter the world of laughter, thrill and animals! Children will have an exciting week as they learn about this traveling show, its animals, and its team of acrobats. Our students will be trained to give the circus performers stiff competition by training on the "tight rope," learning to "tame animals" and much more. The students will complete the week playing circus games, walking on can stilts, making carnival masks and enjoying buttered popcorn. At the end of the week, the curtains will close, and the lights will go out!

Our Favorite Books July 31-August 4

Books come alive as children adventure through storytelling! A good book can take to you a special place. It can motivate you to create your very own masterpiece. This week, students will learn about different genres, enact some popular books, make special crafts, and create lots of memories. Our goal this week is to develop within each student a genuine love for reading and spark their little minds with imagination. Come read with us and find comfort in the coziest reading corner that each classroom will have!

Dinosaurs August 7-11

Dinosaurs are exciting for children of all ages. This week, we will travel to prehistoric times as we explore dinosaur survival. Children will become paleontologists this week as they explore dinosaurs such as Tyrannosaurus Rex, Apatosaurus and Ichthyosaurus. We'll also discuss why dinosaurs no longer roam the earth. Come join the dig as we prepare to go on a fossil hunt of our own!

wild, wild west August 14-18

Wagons ho! Children will trail the pioneers as they travel west in covered wagons. They'll discover hardships, explore new territory and hear tales of famous people. They'll learn about important inventions of the time and cook authentic pioneer food. They'll also recreate pioneer clothing and accessories and learn songs and square dances for the big hoedown!

Art Around the World August 21-25

Technique! Technique! Technique! Traversing across the planet will be this week's adventure. Students will visit different countries through art and explore a range of artists and styles. They will also create a few masterpieces of their own. This week will be full of expression and the application of their creative skills, producing works that will be appreciated for their beauty, simplicity and diversity. At the end of the week, the students will beam with pride as we have an "Art Around the world" exhibition as our grand finale!
